

**IN THE CLAIMS**

Please amend the claims as noted below:

- Sub B1  
A1
21. (Amended) A computer program for providing an interface with displayable computer files on a computer display, said program comprising:
- (1) means for determining a value of at least one display attribute of a first displayable file on a computer;
  - (2) means for determining a type of said first file;
  - (3) means for automatically storing said value associates with data indicating said type of said first file when said first file is closed; and
  - (4) means for displaying a next file of the same type as said first file using the same value of said attribute as said first file when a next file of the type of said first file is opened.

Please add new claims 26-29 as shown below.

- Sub B1  
A2
26. (New) The method of claim 12 wherein said relationship comprises said first and second files having file names with identical portions.

27. (New) The method of claim 26 wherein said file memos each comprise a first and an extension and wherein said file types are dictated by said extension and said first part computer said portion.

28. (New) The method of claim 25 wherein said relationship comprises said first and second files having file names with identical portions.

29. (New) The method of claim 28 wherein said file memos each comprise a first and an extension and wherein said file types are dictated by said extension and said first part computer said portion.
